Office Action Summary

Art Unit: 1624

Applicants' response of January 5, 2004, is noted.

The claims in the application are claims 1—8.

The main rejection, that prevents allowance, here, is claim 7.

The method of making a composition is well known. See the art of record. Claim 7 could not be allowed, here.

This is a 371 application. Content in a 371 application is governed by 37 CFR1. 475.

37 CFR1. 475 provides for one product, and method of use in a 371 application.

The treatment of multiple Sclerosis is applicants' method of use. It would not be within Rule 475 to also include the unpatentable method of using the compounds in claim 7.

Multiple Sclerosis is a very sensitive area of utility. The USPTO is permitted to request proof of utility in a sensitive area of utility that does not have an established successful method of treatment.

Prevention would require much more proof than treating. Therefore, "a prophylaxis" need be removed from line 1 of claim 1.

Claim 1 is not one product as required by 37 CFR 1.475. Claim 1 is unsearchable as it includes too many heterocyclic products in (T) x-A, for instance.

Applicants elected a dihydro isoindole.

The only dihydro isoindole is not in (T) x A at all, but in R7, second formula of page 9 of the most recent amendment.

Therefore, X is zero in the elected material and T is not present.

Art Unit: 1624

Claim 1 is too big to be searched.

What we need here is a genus from the elected subject matter.

Claim 1 should be re-written to the elected subject matter.

37 CFR 1.475 provides for one product, not multiple products.

The multiple heterocyclic rings of pages 4, 7 and 9 of claim 1 are overwhelming.

Claim 1 is rejected as not complying with 35 USC 112, 1st or 2nd paragraph or 35 USC 101, or 37 CFR 1.475. Claim 1 is rejected as being an improper joinder of multiple independent inventions that will support separate patents depending on the heterocyclic ring.

Consider claim 2. The elected R7 is the first instance. The 1, 2nd and 4th instances of that R7 could be reasonably considered here.

In re Joyce, 115 USPQ 42 and In re Herrick provide that an election of species is tantamount to a restriction requirement.

Divisional applications filed, thereafter, are not subject to a double patenting ground of rejection; 35 USC 121.

It is not known what claim 3 is doing here or what it has to do with the rest of the application. Claim 3 is held withdrawn as not relating to the real world of Commerce, see the last office action in regard to Brenner vs Manson.

Claim 4 is rejected only as being dependent on a rejected claim.

Claim 5 has the last two species that are outside the invention elected here.

Any claim not rejected or withdrawn is rejected as being dependent on a rejected claim.
